

Eefe Series – Electric Melting Furnaces

Eefe Series are melting furnaces up to 1500°C in industry. **Eefe series** can be manufactured as tilting type or stationary type according to customer demand.

Due to its design; **SiC melting Pot** and heating elements, can be replaced easily by the operator. By the homogenous heat distribution **SiC pots** will have long service life.

The custom design **PID control** devices produced for our company, minimize the heat fluctuations on the set values. Every step on the control devices can be defined up to **9999** minutes and in case of a power loss the system resumes on.
